Glen Ullin Regional Airport (D57)

Associated City: Glen Ullin

D57's Airport Economic Impacts

The impacts below present the sum of direct and multiplier impacts of all activity associated with D57. The table below offers a breakdown of the total impacts by direct, multiplier, total, and source of impact.

Jobs

6

Payroll

\$342,000

Value Added

\$546,000

Output

\$1.02 M

Source of Impact	Jobs		
	Direct	Multiplier	Total
Airport Management	0	<1	<1
Airport Tenants	0	0	0
Capital Expenditures	3	1	4
GA Visitor Spending	1	<1	1
CS Visitor Spending	N/A	N/A	N/A
Total Jobs Impacts	4	2	6

Source of Impact	Payroll		
	Direct	Multiplier	Total
Airport Management	\$0	\$7,000	\$7,000
Airport Tenants	\$0	\$0	\$0
Capital Expenditures	\$201,000	\$97,000	\$298,000
GA Visitor Spending	\$23,000	\$14,000	\$37,000
CS Visitor Spending	N/A	N/A	N/A
Total Payroll Impacts	\$224,000	\$117,000	\$342,000

Source of Impact	Value Added		
	Direct	Multiplier	Total
Airport Management	\$19,000	\$11,000	\$30,000
Airport Tenants	\$0	\$0	\$0
Capital Expenditures	\$289,000	\$168,000	\$457,000
GA Visitor Spending	\$38,000	\$22,000	\$60,000
CS Visitor Spending	N/A	N/A	N/A
Total Value Added Impacts	\$346,000	\$200,000	\$546,000

Source of Impact	Output		
	Direct	Multiplier	Total
Airport Management	\$25,000	\$19,000	\$44,000
Airport Tenants	\$0	\$0	\$0
Capital Expenditures	\$555,000	\$308,000	\$863,000
GA Visitor Spending	\$71,000	\$42,000	\$114,000
CS Visitor Spending	N/A	N/A	N/A
Total Output Impacts	\$651,000	\$369,000	\$1.02 M

Airport Flight Map

This Instrument Flight Rules (IFR) map shows annual flight activity data and helps to demonstrate the important role that D57 plays in providing time-saving connections for local and visiting businesses and residents. IFR Flights Completed as Filed between January 1, 2024, and December 31, 2024.

Airport Facts

The airport and the activities it supports generate approximately \$104,000 annually in federal, state, and local tax revenues.

An estimated 749 out-of-state visitors traveled through D57 in 2024 via general aviation aircraft.

Visitors using D57 spent approximately \$12,000 on lodging, \$21,000 on food and beverage, \$13,000 on local transportation, \$14,000 on retail, and \$11,000 on entertainment, supporting local businesses throughout the region.

D57 offers 100LL services to based and transient aircraft, allowing the airport to support a variety of critical operations, such as recreational flying, military training, and flight instruction.

Over the past four years, more than \$2.2 million has been invested in capital improvements at D57, averaging approximately \$555,000 annually from federal, state, local, and private funding sources.

Study Methodology

Comprehensive data collection was essential to producing accurate economic impact estimates for calendar year 2024. Primary data sources, including airport staff, airport business tenants, and visitors, were used to estimate direct economic impacts. These data were gathered through onsite visits and a combination of in-person, telephone, and online surveys. Where needed, additional industry sources were consulted to supplement the primary data. A nationally recognized economic modeling platform, IMPLAN, was used to calculate multiplier effects. Economic impacts were estimated for airport management, airport tenants, capital investment activity, GA visitor spending, and commercial service visitor spending.

Economic Impact Levels

The economic impacts for North Dakota's airports are presented at three distinct levels (direct, multiplier, and total) to describe where in the economic cycle the impact is generated.

Direct Impacts

Airport Administration

Airport Tenants

Capital Investment

GA and Commercial Services Visitor Spending

Indirect

Portions of direct output used to purchase goods and services from businesses inside the study region

Multiplier Impacts

Induced

Income earned by workers from direct and supplier sales transactions that are then spent inside the study region

Total Impacts

There are four measures used to express the economic impact of North Dakota's airports: jobs, payroll, value added, and output.

Jobs

Total number of people employed. This includes both full-time and part-time because of aviation.

Payroll

Total employment compensation, including wages and benefits, of those employed

Value Added

The value of final goods and services produced locally because of economic activity, excluding the value of goods and services used to produce them

Output

Total expenditures associated with airport administration, capital projects, tenant sales of goods and services, as well as visitor spending in North Dakota's hospitality-related sectors

About Glen Ullin Regional Airport

Located in Morton County, North Dakota, one mile west of the City of Glen Ullin, Glen Ullin Regional Airport (D57) is a vital rural facility supporting agriculture, healthcare, wildlife management, and tourism. With an asphalt runway and self-service fuel available 24/7, the airport is open to the public and serves as a key access point for the region. Each year, more than 85,000 hunters visit North Dakota, and many reach the area via general aviation aircraft landing at Glen Ullin Regional Airport. Non-resident hunters contribute significantly to the local economy through spending on licenses, lodging, food, and guides. The North Dakota Game and Fish Department uses the airport for wildlife surveys, aerial telemetry, and enforcement operations in remote areas. Jacobson Memorial Hospital Care Center relies on the airport for emergency patient transfers when helicopters are grounded due to weather. Transient aerial applicators also use the airport to treat crops and pastureland, supporting local farmers and ranchers. Even small airports like Glen Ullin Regional play a big role in sustaining North Dakota's economy, health, and outdoor heritage.

Airport Activities

Recreational Flying

Military Training

Flight Instruction

Corporate Activity

Agricultural Spraying

Runways

The most critical infrastructure of an airport is the runway system. Runway characteristics determine the types of activity the airport can support.

Type	Orientation	Dimensions	Surface	Approach
Primary Runway	11/29	3,799 ft x 60 ft	Asphalt	VIS / RNAV (GPS)
Secondary Runway	N/A	N/A	N/A	N/A
Tertiary Runway	N/A	N/A	N/A	N/A
Additional Runway	N/A	N/A	N/A	N/A

Aviation Activity Demand Forecasts

Aviation activity demand forecasts are included in the NDSASP to understand how aviation demand is expected to change over time. These forecasts help inform future infrastructure needs and long-term system planning decisions.

Activity Type	Base Year (2024)	Future Year (2044)	2024-2044 CAGR
Commercial Service Enplanements	N/A	N/A	N/A
Commercial Service Operations	N/A	N/A	N/A
General Aviation Operations	950	1,130	0.86%
Based Aircraft	11	13	0.84%

Note: CAGR = Compound Annual Growth Rate
