Aviation Economic Impact Study

Mercer County Regional Airport (HZE)

Associated City: Hazen

HZE's Airport Economic Impacts

The impacts below present the sum of direct and multiplier impacts of all activity associated with HZE. The table below offers a breakdown of the total impacts by direct, multiplier, total, and source of impact.

Jobs

14

Payroll

\$680,000

Value Added

\$1.02 M

Output

\$1.83 M

Source of Impact	Jobs		
	Direct	Multiplier	Total
Airport Management	3	<1	3
Airport Tenants	1	<1	1
Capital Expenditures	5	2	7
GA Visitor Spending	2	<1	2
CS Visitor Spending	N/A	N/A	N/A
Total Jobs Impacts	10	3	14

Source of Impact	Payroll		
	Direct	Multiplier	Total
Airport Management	\$19,000	\$15,000	\$34,000
Airport Tenants	\$88,000	\$27,000	\$115,000
Capital Expenditures	\$311,000	\$151,000	\$461,000
GA Visitor Spending	\$44,000	\$26,000	\$70,000
CS Visitor Spending	N/A	N/A	N/A
Total Payroll Impacts	\$462,000	\$218,000	\$680,000

Source of Impact	Value Added		
	Direct	Multiplier	Total
Airport Management	\$42,000	\$23,000	\$65,000
Airport Tenants	\$88,000	\$43,000	\$130,000
Capital Expenditures	\$447,000	\$259,000	\$707,000
GA Visitor Spending	\$73,000	\$42,000	\$114,000
CS Visitor Spending	N/A	N/A	N/A
Total Value Added Impacts	\$650,000	\$367,000	\$1.02 M

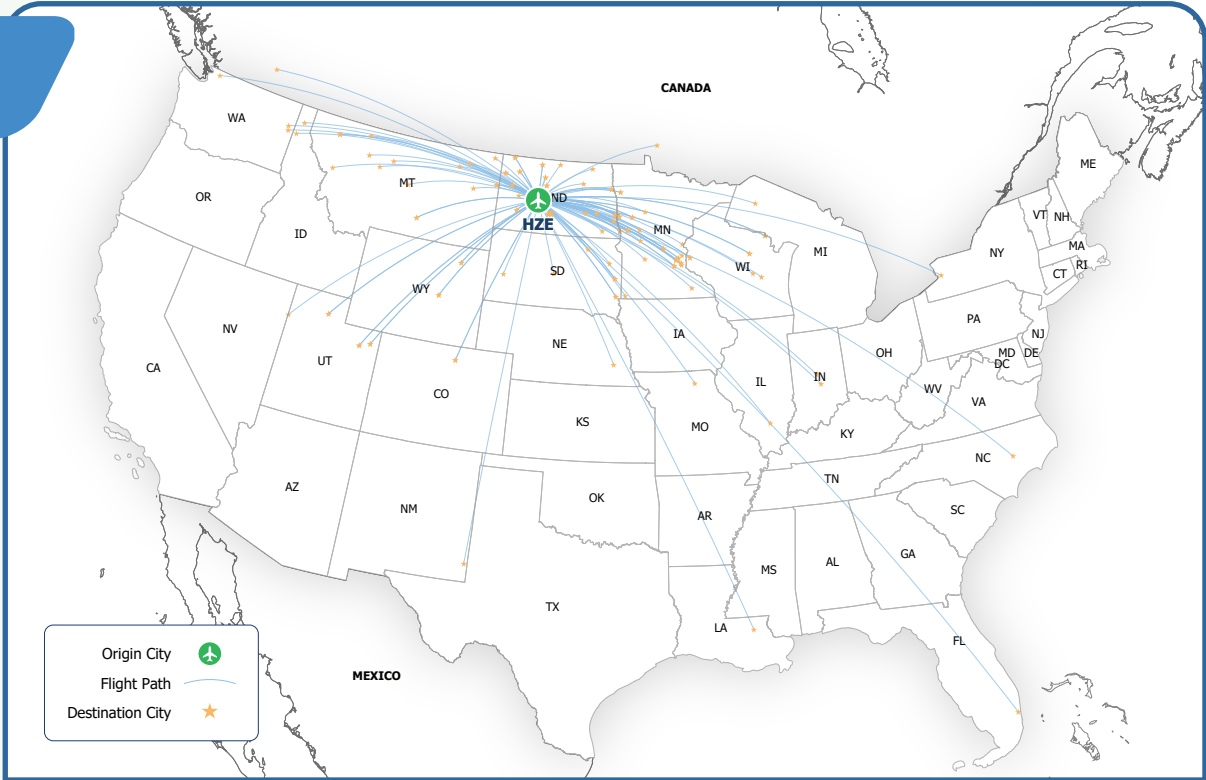

Source of Impact	Output		
	Direct	Multiplier	Total
Airport Management	\$55,000	\$41,000	\$96,000
Airport Tenants	\$102,000	\$76,000	\$178,000
Capital Expenditures	\$858,000	\$477,000	\$1.33 M
GA Visitor Spending	\$137,000	\$81,000	\$218,000
CS Visitor Spending	N/A	N/A	N/A
Total Output Impacts	\$1.15 M	\$675,000	\$1.83 M

Airport Flight Map

This Instrument Flight Rules (IFR) map shows annual flight activity data and helps to demonstrate the important role that HZE plays in providing time-saving connections for local and visiting businesses and residents. IFR Flights Completed as Filed between January 1, 2024, and December 31, 2024.

Airport Facts

The airport and the activities it supports generate approximately \$195,000 annually in federal, state, and local tax revenues.

An estimated 1,435 out-of-state visitors traveled through HZE in 2024 via general aviation aircraft.

Visitors using HZE spent approximately \$23,000 on lodging, \$40,000 on food and beverage, \$25,000 on local transportation, \$27,000 on retail, and \$22,000 on entertainment, supporting local businesses throughout the region.

HZE offers 100LL and Jet-A services to based and transient aircraft, allowing the airport to support a variety of critical operations, such as recreational flying, corporate activity, and aerial inspections.

Over the past four years, more than \$3.4 million has been invested in capital improvements at HZE, averaging approximately \$858,000 annually from federal, state, local, and private funding sources.

Study Methodology

Comprehensive data collection was essential to producing accurate economic impact estimates for calendar year 2024. Primary data sources, including airport staff, airport business tenants, and visitors, were used to estimate direct economic impacts. These data were gathered through onsite visits and a combination of in-person, telephone, and online surveys. Where needed, additional industry sources were consulted to supplement the primary data. A nationally recognized economic modeling platform, IMPLAN, was used to calculate multiplier effects. Economic impacts were estimated for airport management, airport tenants, capital investment activity, GA visitor spending, and commercial service visitor spending.

Economic Impact Levels

The economic impacts for North Dakota's airports are presented at three distinct levels (direct, multiplier, and total) to describe where in the economic cycle the impact is generated.

Airport Administration

Airport Tenants

Capital Investment

GA and Commercial Services Visitor Spending

Indirect

Portions of direct output used to purchase goods and services from businesses inside the study region

Multiplier Impacts

Induced

Income earned by workers from direct and supplier sales transactions that are then spent inside the study region

Total Impacts

There are four measures used to express the economic impact of North Dakota's airports: jobs, payroll, value added, and output.

Jobs

Total number of people employed. This includes both full-time and part-time because of aviation.

Payroll

Total employment compensation, including wages and benefits, of those employed

Value Added

The value of final goods and services produced locally because of economic activity, excluding the value of goods and services used to produce them

Output

Total expenditures associated with airport administration, capital projects, tenant sales of goods and services, as well as visitor spending in North Dakota's hospitality-related sectors

About Mercer County Regional Airport

Nestled in the heart of western North Dakota, Mercer County Regional Airport (HZE) serves as a quiet yet vital gateway to the region's rural charm and economic activity. The airport supports general aviation operations that connect local businesses, agricultural services, and recreational pilots to the broader state and beyond. Recent runway rehabilitation and seal coat improvements have enhanced safety and extended the life of the pavement, ensuring reliable operations for years to come. The airport is a popular choice for transient stopovers, thanks to its low fuel prices and convenient location for pilots traveling across the state. Whether it's crop dusters taking flight over golden fields or small aircraft bringing visitors to nearby Lake Sakakawea, Mercer County Regional Airport plays a steady role in supporting local mobility and access. Its location offers pilots scenic views of rolling prairies and a peaceful flying experience far from the bustle of urban airspace. More than just a landing strip, the airport reflects the spirit of Mercer County—practical, dependable, and essential. With improved infrastructure and welcoming amenities for transient traffic, Mercer County Regional Airport continues to meet the everyday needs of a resilient and close-knit community.

Runways

The most critical infrastructure of an airport is the runway system. Runway characteristics determine the types of activity the airport can support.

Type	Orientation	Dimensions	Surface	Approach
Primary Runway	15/33	4,999 ft x 75 ft	Asphalt	RNAV (GPS) / RNAV (GPS)
Secondary Runway	N/A	N/A	N/A	N/A
Tertiary Runway	N/A	N/A	N/A	N/A
Additional Runway	N/A	N/A	N/A	N/A

Aviation Activity Demand Forecasts

Aviation activity demand forecasts are included in the NDSASP to understand how aviation demand is expected to change over time. These forecasts help inform future infrastructure needs and long-term system planning decisions.

Activity Type	Base Year (2024)	Future Year (2044)	2024-2044 CAGR
Commercial Service Enplanements	N/A	N/A	N/A
Commercial Service Operations	N/A	N/A	N/A
General Aviation Operations	1,500	1,590	0.28%
Based Aircraft	18	21	0.77%

Note: CAGR = Compound Annual Growth Rate
